

## EDGE Router - GPRS/EDGE router ER75i

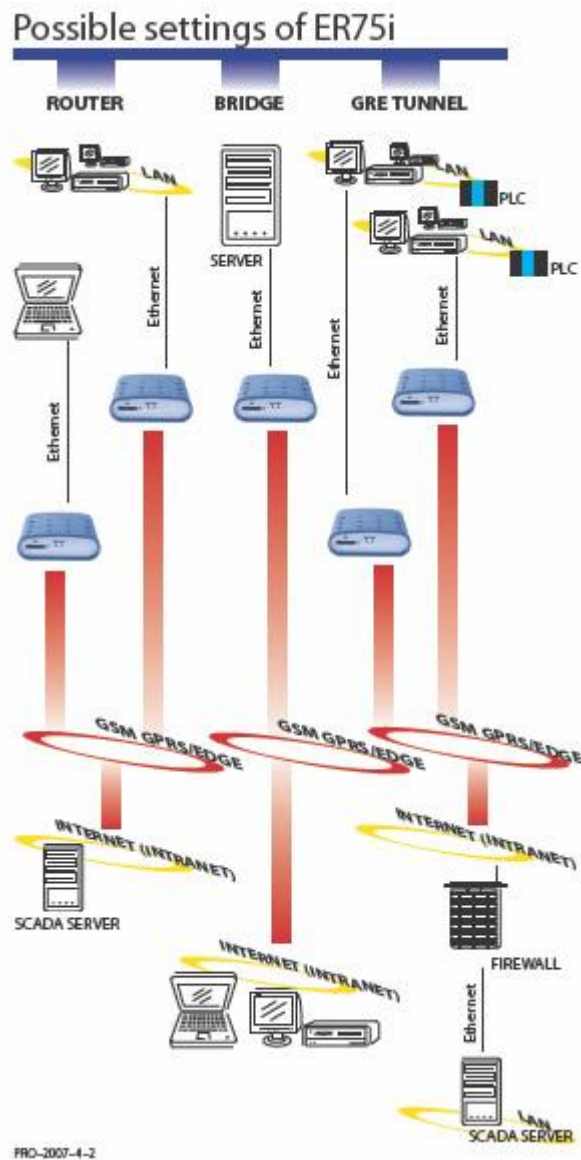

# GPRS/EDGE EDGE router ER75i

GPRS/EDGE router ER75i interconnects equipment with ethernet 10/100 or serial interface via GPRS/EDGE technology into Internet or intranet – computers, controlling machines (PLC), LAN networks, ATM, cameras etc.

Router is standardly equipped by ethernet 10/100 and USB-B port. On request of customer we can deliver version with optional port 1 - RS232 or RS485 or MBUS or inputs/outputs (I/O).

- \* Interface ETHERNET 10/100, USB 2.0 - B, on request optional port 1 - RS232/RS485/M-BUS or I/O (CNT)
- \* DHCP – automatic IP addressing in LAN network
- \* HTTP server – administration via web interface
- \* NAT – address translation between between outer and inner network
- \* SMS info – SMS following power supply on, while loosing connection or by using GPRS
- \* Remote control possibility via SMS (off/on connection etc.)
- \* IPsec – VPN encryption protocol for secure communication
- \* Support of OpenVPN - secure connection via encrypted tunnel
- \* DynDNS – dynamic IP address support
- \* NTP – time synchronization
- \* SNMP for MBUS or I/O port communication
- \* Support of NAT-T and X.509
- \* Online information on GSM signal strength
- \* L2TP - tunnel protocol implemented
- \* Support of VRRP
